# A Natural History of Conifers (Hardback)

By Aljos Farjon

Timber Press, United States, 2008. Hardback. Book Condition: New. 269 x 190 mm. Language: English . Brand New Book. Conifers are the most diverse, interesting, beautiful trees in the world, so why is it that our gardens are home to so few species? Part of the reason lies in their economic importance which, by focusing attention on relatively few species, has limited our understanding of one of the most remarkable plant groups on earth. Leading expert Aljos Farjon provides a broader perspective with this compelling narrative that observes conifers from the standpoint of the curious naturalist. It starts with the basic question of what conifers are and continues to explore their evolution, taxonomy, ecology, distribution, human uses, and issues of conservation. As the story unfolds many popular misconceptions are dispelled, such as the notion that all conifers have cones (untrue), and the extraordinary diversity of conifers begins to dawn as Farjon describes the diminutive creeping shrub Microcachrys tetragona, whose strange seed cones resemble raspberries, and the prehistoric-looking Araucaria meulleri. The taxonomic diversity of conifers is huge and Farjon goes on to relate how, over the course of 300 million years, these trees and shrubs have adapted to survive geological upheavals,...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
